

Since I started training in child surgery I'm fascinated by the aesthetic aspect of medicine. I always try to keep the cicatrices as small and beautiful as possible.

Since 1996 I'm working with a medical Laser. I have attended further education events, congresses and hospitals and everytime I returned with enthusiasm and full of beans.

1999 I took the chance for a private practice in a splendid ambiance.

*Will it always be so flawless?*

Exchange of experience with the associates is very interesting and my customers benefit enormous from that. I always try to achieve the optimal possible and satisfy the customer in a relaxed and calm atmosphere.
